

SS25 Catalogue

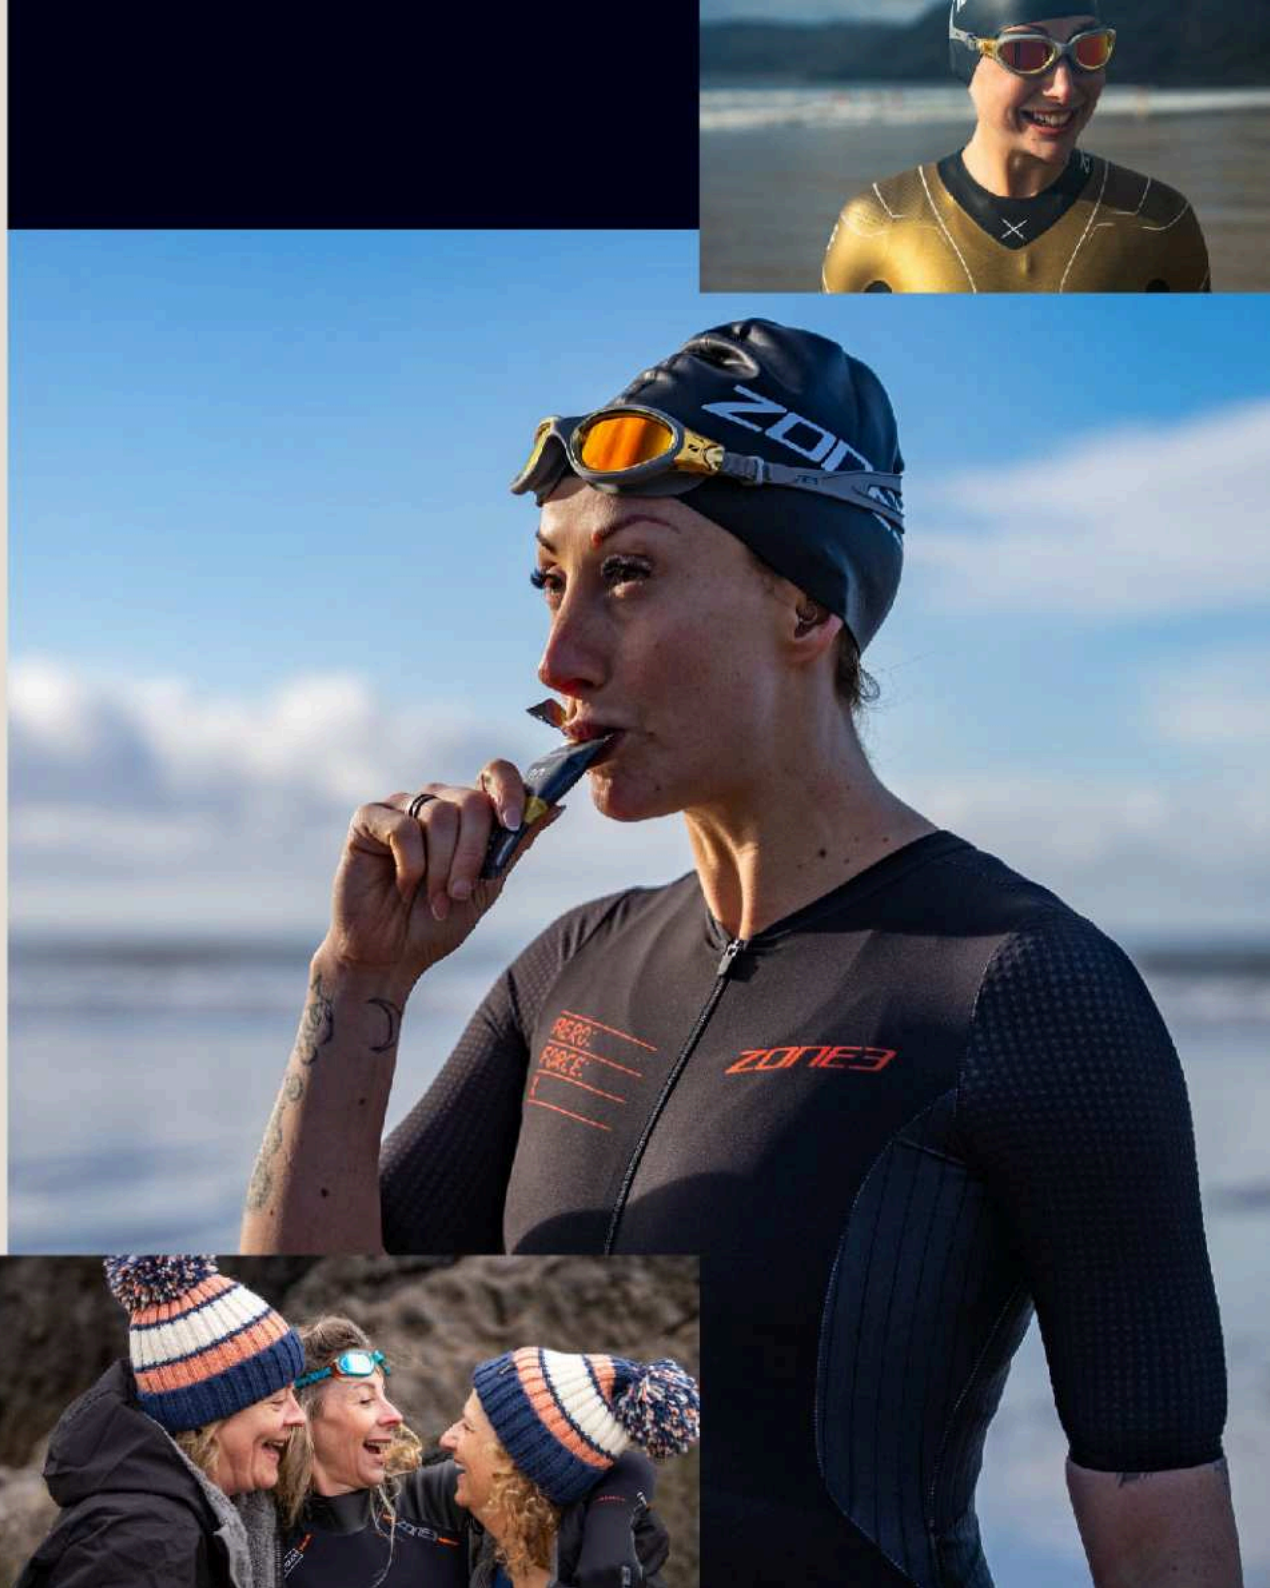

We are extremely excited to let you know that ZONE3 has won a 2024 Kings Award for business enterprise in the International growth category.

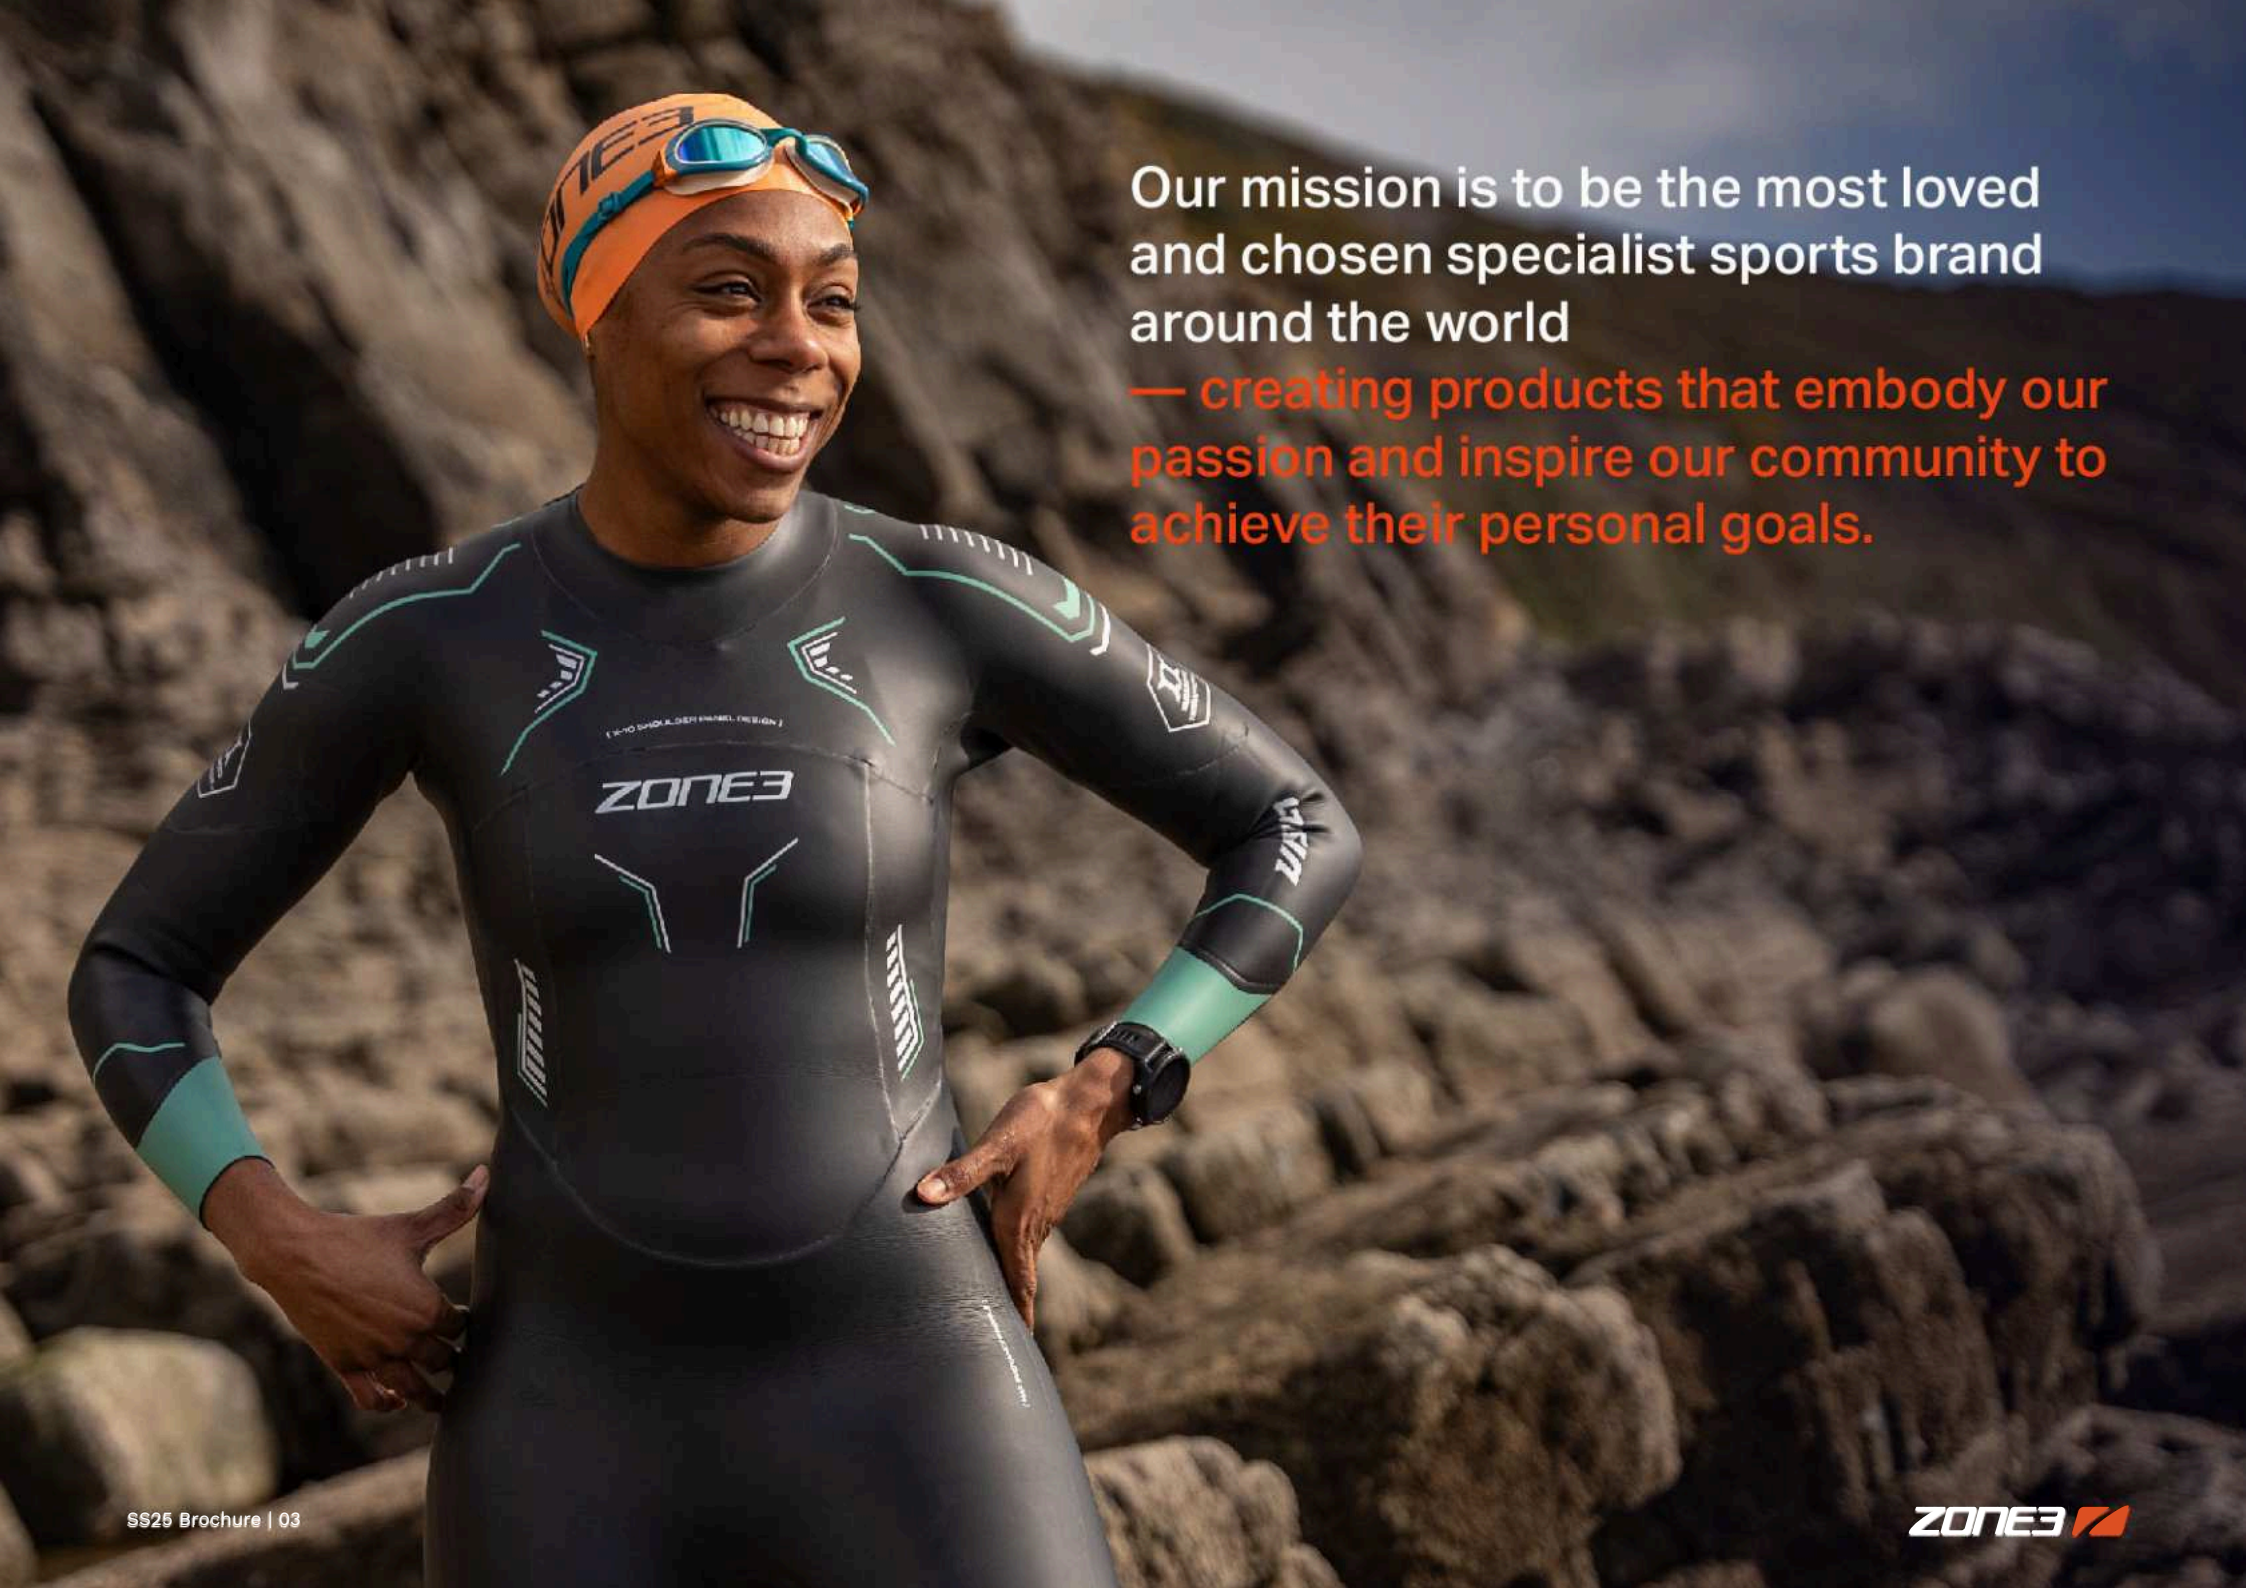

We will attend a formal prize giving ceremony at Windsor Castle in July where King Charles will present our award.

Thank you for all your support over the years which have helped contribute to this achievement.

A smiling woman with dark skin and short hair is standing on a rocky, uneven shore. She is wearing a black Zone3 wetsuit with teal and white accents, an orange swim cap with 'ZONE3' written on it, and blue-tinted goggles. She has her hands on her hips and is looking towards the camera. The background shows a rugged coastline with dark rocks and a cloudy sky.

Our mission is to be the most loved
and chosen specialist sports brand
around the world

— creating products that embody our
passion and inspire our community to
achieve their personal goals.

Why choose ZONE3?

- A collection of the highest-rated products on the market.
- Developed and perfected by athletes.
- The highest quality product whilst maintaining affordable pricing.
- Superior brand imagery and product assets.
- Highest standards in customer service.
- Committed to developing sustainable products.

Design. Develop. Innovate.

Flexible, fast and very, very hard to fault.

Vision Wetsuit
220 Triathlon Magazine

A brilliant all-rounder that comes at a great price.

Advance Wetsuit
220 Triathlon Magazine

As close to perfection as you can get with a wetsuit.

Vanquish Wetsuit
Triathlon Plus

What make us different?

From first timers to elite-level triathletes, the athlete has always been at the centre of our design process, constantly striving to help them succeed.

At the very beginning this was a personal motive as founder and elite triathlete, James Lock, looked to gain an advantage over the opposition.

This passion and motivation runs through every product in our range today, supporting athletes in all aspects of their racing, training and lifestyle.

In addition to reworking and adding new technologies and innovation to existing products, we have also added some exciting new, cutting-edge products to ensure we remain at the forefront of product development and innovation.

Zone Green - Sustainability

Our sport is made better by nature.

As a brand we are passionate about protecting our environment for future generations to explore through open water swimming and triathlon.

We aim to continue to lead the way on sustainability, forever developing, improving, and innovating, bridging the gap between performance and nature. We have come a long way and offer the most comprehensive range of eco sensitive products in our industry.

Leading the way in eco wetsuit technology

We are excited to be the first triathlon brand to use YULEX®, a natural plant-based rubber sourced from the Havea tree. The sap of the tree is purified, refined, and made into a Yulex® dry solid rubber. This material can then be moulded and sliced to a desired thickness and laminated, ready to be manufactured into wetsuits.

Yulex® as a material has some incredible properties that are leaps ahead of other materials on the market, and by using plant based rubber we can dramatically reduce a suits CO2 emissions by up to 80%.

We are proud to be the first triathlon brand to introduce biodegradable neoprene into their performance wetsuits. We have introduced a cutting edge and ground breaking biodegradable rubber by Yamamoto in 2 of our high performing wetsuits. Once it reaches end of life it will biodegrade by 30% in 522 days. It retains the level of performance of the widely adopted Yamamoto SCS material utilised in other prominent suit designs.

We continue to use Yamamoto across our entire performance wetsuit collection, which contains only the highest grade of limestone, containing 99.7% Calcium Carbonate as a raw material. Earth mined Limestone is used to replace petrochemicals in the neoprene. It comes from nature and has a lessened impact on the environment.

Recycled tyres are used to make Carbon black, one of the key ingredients of neoprene, which cuts CO2 emissions by 200g per wetsuit.

Water based glue is used instead of harmful solvent-based glue to bond seams and our linings are made from recycled polyester. In fact, 45 plastic bottles are recycled for every wetsuit lining.

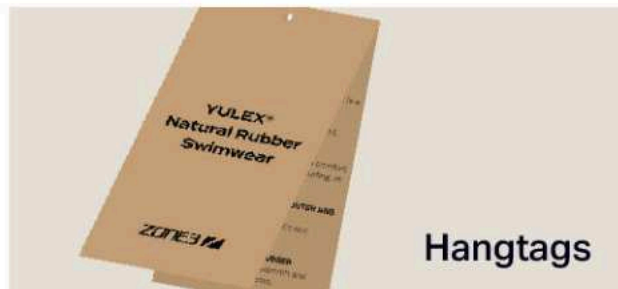

Natural, Renewable, Traceable - Yulex®

Packaging Innovation.

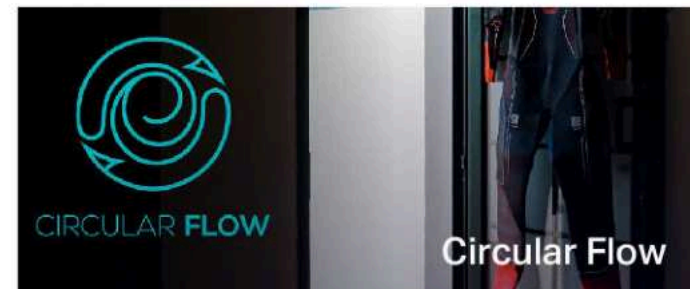

Aquapak bags

We are introducing Aquapak bags, a sustainable alternative to single use plastic bags for our product packaging. Developed in Britain, our eco Aquapak bags are fully biodegradable, and dissolve fully in hot water in moments, into an eco-friendly biomass.

Hangtags

Our hangtags use recycled paper, we have reduced the amount of information needed on the tag by having a QR code linking to the website for more details. This enables the tags to be smaller and therefore create less waste.

Circular Flow

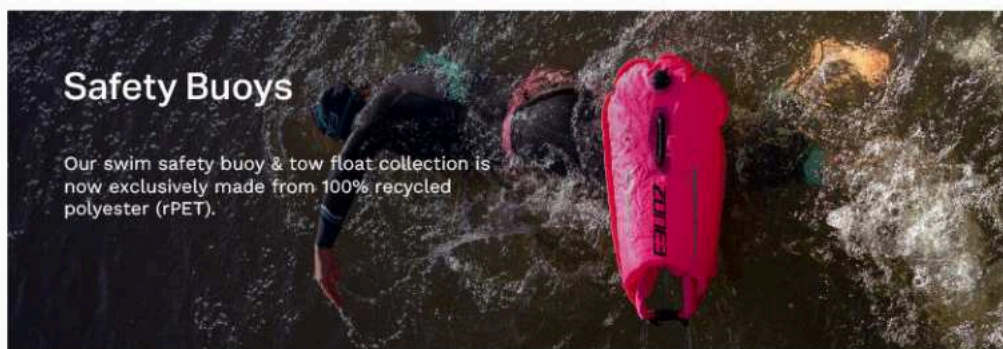

ZONE3 has teamed up with Circular Flow to drive a truly global circular economy for neoprene waste, a significant step in wetsuit and neoprene recycling. Circular Flow's innovative closed-loop recycling process, developed in collaboration with the University of Chemical Technology and Metallurgy in Bulgaria, aims to divert 8,380 tonnes of wetsuits from landfills annually and we proud to be supporting this journey.

Recycled Product Development.

Thermo Tech Robes

Our thermo tech robe collection are made from recycled plastic bottles, including the moisture wicking, inner thermal lining. The same water resistance, wind protection and thermal lining you know and love, but 100% recycled.

Safety Buoys

Our swim safety buoy & tow float collection is now exclusively made from 100% recycled polyester (rPET).

Swimwear

The ZONE3 swimwear collection* is crafted sustainably using Xfinity renew fabric, a polyester yarn formed from recycled bottles.

Xfinity renew fabric retains all the performance features you would expect from ZONE3, while enjoying enhanced eco credentials.

*Excludes the FINA approved range and the TI+ range.

Triwear

The new activate+ triwear collection utilises recycled materials throughout, including 100% recycled lycra sport fabric, 100% recycled mesh back, as well as recycled chamois and grippers.

Wetsuits

Introducing a collection of multi award winning wetsuits. Each style has been refined and improved over the last fifteen years and our reputation continues to grow as being the best triathlon wetsuit brand in the world.

Designed for beginners all the way through to elite athletes, each suit offers the very best performance, comfort and fit for the given price point.

AQUA DYNAMIC COATINGS

All our suits are coated with an aqua dynamic covering which significantly minimises any drag through the water as well as improving durability.

ULTRA THIN & LIGHTWEIGHT

We developed a neoprene that is extremely lightweight, thin and comfortable, allowing the user to feel as if they aren't wearing a wetsuit at all.

BIODEGRADABLE NEOPRENE

Selected wetsuits combine earth mined limestone with scrap rubber tyres to reduce energy consumption and CO2 emissions by 200g per suit.

We are pleased to be the first tri brand to introduce biodegradable rubber, a ground breaking leap forward in performance wetsuit manufacturing.

HIGHLY DURABLE

Designed for speed, flexibility and a natural feeling swim; all without loss of strength. Our wetsuits are extremely durable and made to last as part of our commitment to the athlete.

PRO SPEED CUFFS™

Pro Speed™ arm and leg cuffs use a specifically formulated silicone coating to make the wetsuit come off extremely quickly. Perfect to increase transition speed.

BIO RUBBER

With exclusive use of the Bio Rubber material on our Vanquish-X wetsuit, this cutting edge material collects energy from the atmosphere and re-emits this energy for absorption into the body. A design proven to increase blood flow, reduce lactic acid build up and fatigue.

SPRING LOADED DESIGN

All our suits offer a spring loaded shoulder design to generate a more rhythmic swim stroke, enabling faster and more energy efficient swimming.

MEASURED BUOYANCY

All our suits feature balanced neoprene thickness to give you maximum buoyancy and core support without disturbing your stroke.

UNPARALLELED FLEXIBILITY

The Yamamoto neoprene used in all our wetsuits has been developed to allow for maximum flexibility with a 4-way stretch. This provides unrestricted movement stroke after stroke, minimising fatigue and muscular tension in the shoulders, chest, abdomen and legs.

Vanquish-X Wetsuit

WS22MVAN101 | WS22WVAN101

Vanquish-X Wetsuit
Limited Edition

WS24MVANLE101 | WS24WVANLE101

- + GLOBAL EXCLUSIVE AGREEMENT with Yamamoto Corporation for use of Bio-Rubber material which is incorporated on front thighs and back lumbar of the Vanquish-X
- + X-10 EXTREME SHOULDER PANEL design with new #40 SCS 1mm.
- + MAXIMUM BUOYANCY with Aerodome and NBR panels.
- + BRS MARK 0.3MM SCS on the sleeve for an ultra-lightweight arm rotation.
- + UPDATES TO THE COLLAR and leg design to improve the fitting.
- + NEW ALPHA TITANIUM LINING on the upper body to improve circulation and warmth as well as SILK X to aid smoother transitions.
- + B.R.E BODY ROTATION ENHANCEMENT on the chest to improve distance per stroke.
- + SCS COATING throughout improve the hydrodynamics of the suit.
- + COOL-SPOT FOREARM PANELS for improved feel and catch in the water.

Vanquish-X Wetsuit

The Vanquish-X takes performance to a completely new level. Highly regarded as one of the best triathlon wetsuits in the world, the key selling features of the Vanquish have not changed. However, the 2022 version includes revolutionary Bio-Rubber materials on the thighs to improve blood flow and an Alpha Titanium lining on the upper body to improve warmth and circulation.

*the limited edition Vanquish X come with exclusive venator x goggles, swim cap and transition backpack bundle.

This suit is fast, comfy and the new improved features make it a stand out suit to race and train in. I would 100% recommend it.

Tim Don
4X ITU World Champion

Biodegradable Neoprene

We're proud to maintain our position at the forefront of sustainable innovation with the introduction of our second suit made from biodegradable neoprene: the Aspire. Crafted from Yamamoto's groundbreaking biodegradable material, this new addition expands our collection and solidifies our commitment to eco-conscious practices.

The cutting edge rubber biodegrades by 30% in 522 days once it reaches its end of life, while retaining the performance capabilities of the widely adopted Yamamoto SCS material utilised in other prominent suit designs.

The ultra-stretch material allows for a maximum range of motion, providing you with the freedom to move unrestricted and perform at your best. Perfect for beginners, experienced swimmers and those looking to upgrade to a higher performance, or more flexible wetsuit.

- + X-10 one-piece shoulder panel design extends across the chest and shoulders to give even more flexibility and stroke efficiency.
- + B.R.E Body Rotation Enhancement panel on the front chest to help maximise distance per stroke and body roll during the swim.
- + Use of 10 different materials to maximise performance, comfort and durability.
- + Men's suit featuring 5mm buoyancy panels on the torso and front legs as well as Aerodome on the hip panels to offer significant core support.

A BRILLIANT ALL-ROUNDER
THAT COMES AT A GREAT PRICE

220 Triathlon Magazine

Mens's Advance Wetsuit

WS25MADV101

Womens's Advance Wetsuit

WS25WADV101

Wetsuits

Advance Wetsuit

A huge step forward has been made for the Advance wetsuit including the use of the world's highest performance YAMAMOTO foam. Recognised as the best entry-level wetsuit on the market, the Advance takes performance to the next level, and maintains a premium look at a reasonable price point.

The Advance is an amazing value suit that certainly doesn't lack in performance - punching well above its price tag. The perfect suit for open water swimmers or triathletes Looking for a high performance entry-level wetsuit.

- + Yamamoto #39 SCS Free-Flex shoulder panel.
- + Weight reduced by 16% versus the previous version whilst offering same buoyancy and warmth.
- + Use of 10 different materials to maximise performance, comfort and durability despite the low price point.
- + A mixture of SCS and Smoothskin used according to the panel position.
- + 4mm buoyancy panel on torso and legs for core support.
- + Pro-Speed cuffs on the legs for easy removal.
- + Laser-cut collar.
- + Raglan sieve panel layout for flexibility and stroke efficiency.
- + Premium graphics including black gloss and gunmetal finishes contrasting with contemporary colour contrasts.

Men's Agile Wetsuit

WS21MAGI116

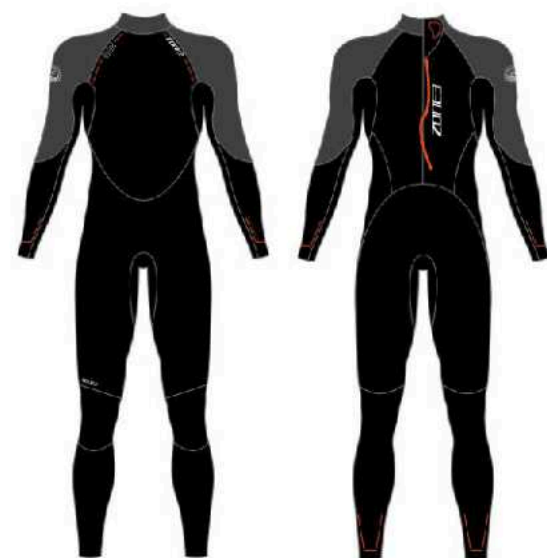

Women's Agile Wetsuit

WS21WAGI114

Agile Wetsuit

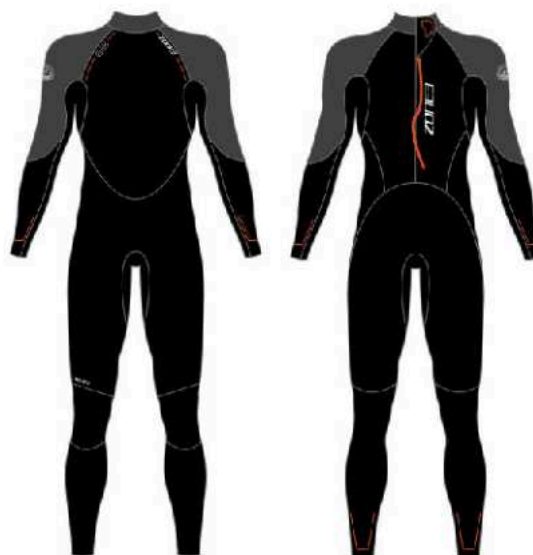

The Agile was created to meet the growth in demand of a high quality, entry-level wetsuit.

- + No flatlock stitching. Fully glued and blind stitched to ensure waterproof seams, flexibility through the suit and no internal seam discomfort.
- + No nylon neoprene panels. The Agile is made from a mixture of Speedflo and Smoothskin coatings to ensure water doesn't enter the suit or get heavy and cause drag.
- + Performance focus. Like all ZONE3 products, even though the materials and thickness can't compare with the likes of our Aspire, the Agile is designed for speed and comfort.
- + Talon Resistant Coating. A unique formula applied to the leg and side panels to improve durability and reduce customer service or warranty questions when beginners create fingernail tears by accident.
- + 2mm Flex-Fit shoulder panels for flexibility and a 4mm legs panel for core buoyancy support.
- + A combination of 2mm, 3mm and 4mm panels and appropriate linings to offer a well-balanced and comfortable swim.
- + Slimline Pro Speed Cuffs for speed of removal.
- + Modern styling and graphics which align with our Advance and Vision models.

**Men's Active-Flex
Wetsuit**

WS25MACTF101

**Women's Active-Flex
Wetsuit**

WS25WACTF101

2025
NEW
DESIGN

Active-Flex Wetsuit

The Active-Flex wetsuit can be used to swim, surf and paddle board in water temperatures from 15 to 21c.

A combination of 3mm and 2mm high stretch neoprene offers superior flexibility for a range of activities and swimming strokes, while the 3mm Yulex chest panel provides warmth where it matters most.

Smoothskin panels on the shoulders and upper arms deliver greater hydrodynamics when swimming in the suit. Double lined neoprene features throughout the rest of the wetsuit which is durable and warm.

Finally, abrasion resistant kneepads are utilised on the knees allowing the suit to be using for boardsports.

- + Smoothskin panels on upper arms and neck for increased glide in the water.
- + Centre back zipper with extended makes changing in and out of the wetsuit easy.
- + 3mm YULEX chest panel.
- + High stretch panels at crotch to allow for increased movement during breaststroke (use Aspect for reference).
- + Abrasion resistant pads at knees.

Men's Thermal Aspire Wetsuit

WS22MTHRM101

- + **Warmth:** Staying warm is the key feature of the Thermal Aspire Wetsuit, to achieve that we have combined Premium SCS #39 Yamamoto fabrics known for their high heat retention, with Thermo Tech Thermal lining added to the key muscles groups which require extra warmth when swimming in colder conditions.
- + **High Visibility:** Neon orange and silver graphics increase visibility in the lower light conditions of Autumn and Winter.
- + **Speed:** Fast in the water, the aqua dynamic 'SCS' Nano coating reduces the drag of a regular wetsuit from 0.4 to just 0.021.
- + **Environmentally Friendly & Buoyant:** Derived from limestone that increases buoyancy levels for the swimmer.

Women's Thermal Aspire Wetsuit

WS22WTHRM101

- + **Neoprene:** Chest, legs and body panels use a combination of 3mm, 4mm and 5mm neoprene with the addition of our plush Thermo Tech Thermal lining on the interior. The Flex-Fit shoulder panels and arms consist of 1.5mm thickness with a high stretch lining for flexibility.
- + **Pro-Speed Cuffs** on wrists and ankles offer superior removal speed.
- + **Flexibility:** A massive 480-580% in elongation, compared with human skin (underarm) which is just 60-70%. Superior flexibility and comfort with an expansion of 7x conventional wetsuit materials.

Thermal Aspire Wetsuit

Designed in response to the ever-increasing demand to swim outdoors all year around. Sometimes we need to swim in conditions that our normal wetsuits just weren't made for. For those colder swim, we have taken one of the highest-rated wetsuits of the last decade - the Aspire and added a carefully upgraded flexible Thermo Tech Thermal lining to enhance its warmth properties without compromising swim experience.

Superb swim experience.

2025
NEW
DESIGN

Versa Swim Run Wetsuit

The multi-purpose Versa wetsuit is extremely versatile in design making it ideal for paddle sports such as Standup Paddleboarding, Surf Lifesaving, Swimrun events or any other water-based adventuring.

- + Fully recycled interior and exterior linings.
- + Flatlock construction throughout for comfort and flexibility.
- + 50% Yulex Natural Rubber / 50% Smoothskin Neoprene.
- + 2mm Thickness throughout provides flexibility and warmth.
- + Durable double lined 2mm YULEX for warmth, stretch and abrasion resistance.
- + 2mm Smoothskin on front for increased glide in the water.

This is an excellent performance oriented swimrun wetsuit. It is extremely comfortable for both running and swimming in and looks phenomenal. You would happily wear it all day and then to the after-party!

swimrun.com

Evolution Swimrun Wetsuit

The concept design of the Evolution has shifted from a swimming wetsuit you can run in, to a running wetsuit which you can swim in. This sounds simple but has involved a full redesign process carefully balancing the flexibility, buoyancy and a 30% weight reduction. We believe we have found the perfect combination and have a built a market leading Swimrun suit ready to take on the competition and excel in the sport.

- + Each suit features removal arm sleeves available for purchase separately.
- + Yamamoto #39 SCS shoulder panels for ultimate flexibility.
- + Weighing only 650 grams whilst still offering great buoyancy panels and core body warmth properties. This is the lightest full neoprene Swimrun suit on the market with over 2 pockets.
- + Sandwich panels chest construction providing 3mm buoyancy panels within a 1.5mm panel to give the buoyancy and warmth required without sacrificing flexibility for chest expansion and comfort during the run.
- + 5mm Asradome torso panels for maximum buoyancy within the small space available.
- + Ultra- lightweight and high stretch leg panels in nylon material with internal silicone leg grippers for comfort and durability.
- + 6 storage pockets - Double zipped pockets on back, inside pockets as well as side of legs.
- + Smaller and lighter weight zipper compared to swimming wetsuits.
- + A combination of high visibility silver back panel to reflect the sun's heat during the run and gunmetal panels for a premium and functional look.

Yulex®

Designed for your wild swimming, surfing, or paddle boarding adventures, the ZONE3 Yulex® Swimwear range will keep you warm without that restrictive wetsuit feeling. It is eco-friendly too; by using natural rubber, the suit's CO² emissions are reduced by up to 80%.

In response to our consumer feedback, we have extended our size range to be more inclusive, meeting the needs of the growing and diverse open water swim community as this range is designed for recreational open water swimming rather than performance.

Designed for more recreational Open Water swimmers rather than performance speed swimmers.

Yulex® swimwear products offer great versatility, they can be used as an outer or base layer for added warmth.

Men's Yulex® Jammer

NA23MYJ103

The Men's Yulex® Natural Rubber Jammer is made for all your open water adventures. Featuring 1.5mm thickness throughout and an adjustable drawstring they provide core warmth and protection from the elements while slowing great freedom of movement, whatever the activity. They are eco-friendly too; by using natural rubber, the jammers CO2 emissions are reduced by up to 80% supporting the global mission to reducing our carbon footprint.

Men's Yulex® Top

NA23MYT103

The Men's Yulex® Natural Rubber Long Sleeve Top is made for all your open water adventures. Featuring 1.5mm thickness throughout and full coverage across the back and arms, it provides core warmth and protection from the elements while allowing great freedom of movement, whatever the activity. It is eco-friendly too; by using natural rubber, the suits CO2 emissions are reduced by up to 60%, paving the way for a brighter and greener future.

Yulex® Swimwear

A first for ZONE3, Yulex® natural rubber is a plant-based alternative to traditionally produced neoprene that dramatically reduces the garment's carbon footprint.

- + Provide freedom of movement and comfort whether you are wild swimming, surfing, or paddle boarding.
- + 100% recycled polyester outer and inner fabric. Further enhancing the garment's eco credentials.
- + 1.5mm Yulex® Natural Rubber.
- + 1.5mm thickness provides warmth and protection from the elements.
- + Flatlock seams.

Men's Yulex® Kneeskin

NA24MYKS103

The New Yulex® Kneeskin is designed to keep your core warm, the sleeveless style allows for full movement around the arms, plus it's made fully out of Yulex. The centre back zip fastening allows ease of wear, and it is designed to keep you warm and dry during your various activities. This piece of swimwear features high-quality Yulex® material with two way stretch technology for enhanced fit and flexibility, helping you move more freely in the water.

Large Microfibre Towel

OW22LMFT103

Super absorbent towelling material which folds up neatly and is perfect for packing and using straight after a swim. Anti-bacterial properties also help to keep the towel fresh after swimming in open water. Measures 80cm x 150cm when folded out.

A man is shown from the chest up, in profile, looking towards the right. He is wearing a red swim cap with the 'ZONE3' logo in black. A pair of swimming goggles with yellow lenses is perched on his forehead. He is wearing a black sleeveless neoprene wetsuit. On the back of the wetsuit, there is a white circular logo with 'ZONE3' inside, and a large graphic consisting of a vertical red stripe flanked by two areas of white diagonal hatching. The background is a blurred view of the ocean with white-capped waves under a clear sky.

Neoprene Apparel

The neoprene apparel range has been designed to help swimmers continue training throughout the year. Many unheated pools get cold during the winter months so this range helps to maintain body heat and protect from the cold. Also, great for open water swimming when it's too hot for a full suit.

Buoyancy Shorts

Active-Flex Buoyancy Jammer

NA24UABS101

Introducing the Active Buoyancy Short, a must-have for beginner swimmers. This innovative alternative to pull buoys improves body position and swim technique while providing a natural feeling experience. The Active Buoyancy Shorts are made with a smoothskin front panel and nylon side and back panels, with enhanced core support. The perfect choice for those looking to develop their skills and maximise value. ZONE3 were the original designers of this product concept and the Active Buoyancy Short is designed to drive a high volume of sales as a result of the low price point. Dive into the world of swimming excellence with the Beginner's Buoyancy Short and experience improved performance in the water.

The Originals: 5/3mm

NA18MBSO101

Made from top quality Yamamoto Smoothskin neoprene and stitched and bonded the same way as our wetsuits. Designed using 3mm neoprene down the centre and 5mm neoprene on the sides. The shorts offer core body buoyancy and help to promote hip rotation.

The Premium Option: 5/3mm

NA18MBSP101

The Premium version utilises combination of Yamamoto #39 SCS on the front and back panels, and Yamamoto SCS Aerodome on the side panels. This gives a softer, lighter and more flexible fit along with more buoyancy and hip rotation that is suited to heavy legged swimmers.

Neoprene Accessories

For those wanting to train year-round, our neoprene accessories range is your go-to. Perfect for maintaining flexibility across a wide range of temperatures, neoprene fabric offers many advantages that make it the ideal fabric for training in those cooler months.

Thermo-Tech Accessories

Thermo-Tech Neoprene Swim Cap

NA21UHTC116

A thermal version to complement our socks and gloves. 4mm in thickness with fleece lining to help get through those colder swims.

Thermo-Tech Warmth Swim Mitts

NA24UHTM101

The Thermo-Tech Swim Mitts are the perfect companion for swimming in colder waters. Constructed using stretchy 3.5mm double-lined neoprene, the mitts offer durability and warmth. The easy access pattern makes the mitts easy to slip on and off, while the glued and blind-stitched seams, coupled with a liquid seal finish, create a watertight barrier. To top it off, the extended wrist design provides a secure and comfortable seal, and the 3D printed palms offers an enhanced grip. With the Thermo-Tech Warmth Swim Mitts you'll have the confidence to tackle any cold swim head-on!

Thermo-Tech Neoprene Swim Socks

NA18UHTS101

Our warmest sock made from a slightly thicker neoprene with a thermal lining for improved insulation. There is a zip on the side for a snugger fit, and easier access. The socks also have a Velcro strap to help minimise water entry and a gripped sole.

Thermo-Tech Neoprene Swim Gloves

NA18UHTG101

Our warmest glove made from a slightly thicker neoprene with a thermal lining for improved insulation. Constructed using liquid seal waterproof seams to help prevent water entry with a Velcro strap and longer Lycra sleeve to enable a secure fit.

Neoprene Accessories

Thermo-Tech Balaclava V2

NA24UBAL101

A thermal head cover designed to fit underneath any wetsuit and provide warmth to those swimming all year round. Designed to provide a secure seal to prevent water entry along with a high stretch lining for optimum comfort.

Other Accessories

100% Natural Glide

NA18UGLI107

Made in Canada with 100% natural ingredients to prevent chafing and irritation, inflammation and skin problems caused by friction such as blisters, skin burns and dehydration.

Open Water Accessories

Recycled 28L Safety Buoy or Dry Bag

Now made with 100% Recycled Polyester, the ZONE3 dry bag features dual air bladders that inflate around the storage compartment with a large 28L capacity. The adjustable dual belt design attaches securely around the swimmer's waist and the leash ensures that the product remains out of your stroke range whilst swimming. In addition, the Buoy's now have reflective logos for added visibility.

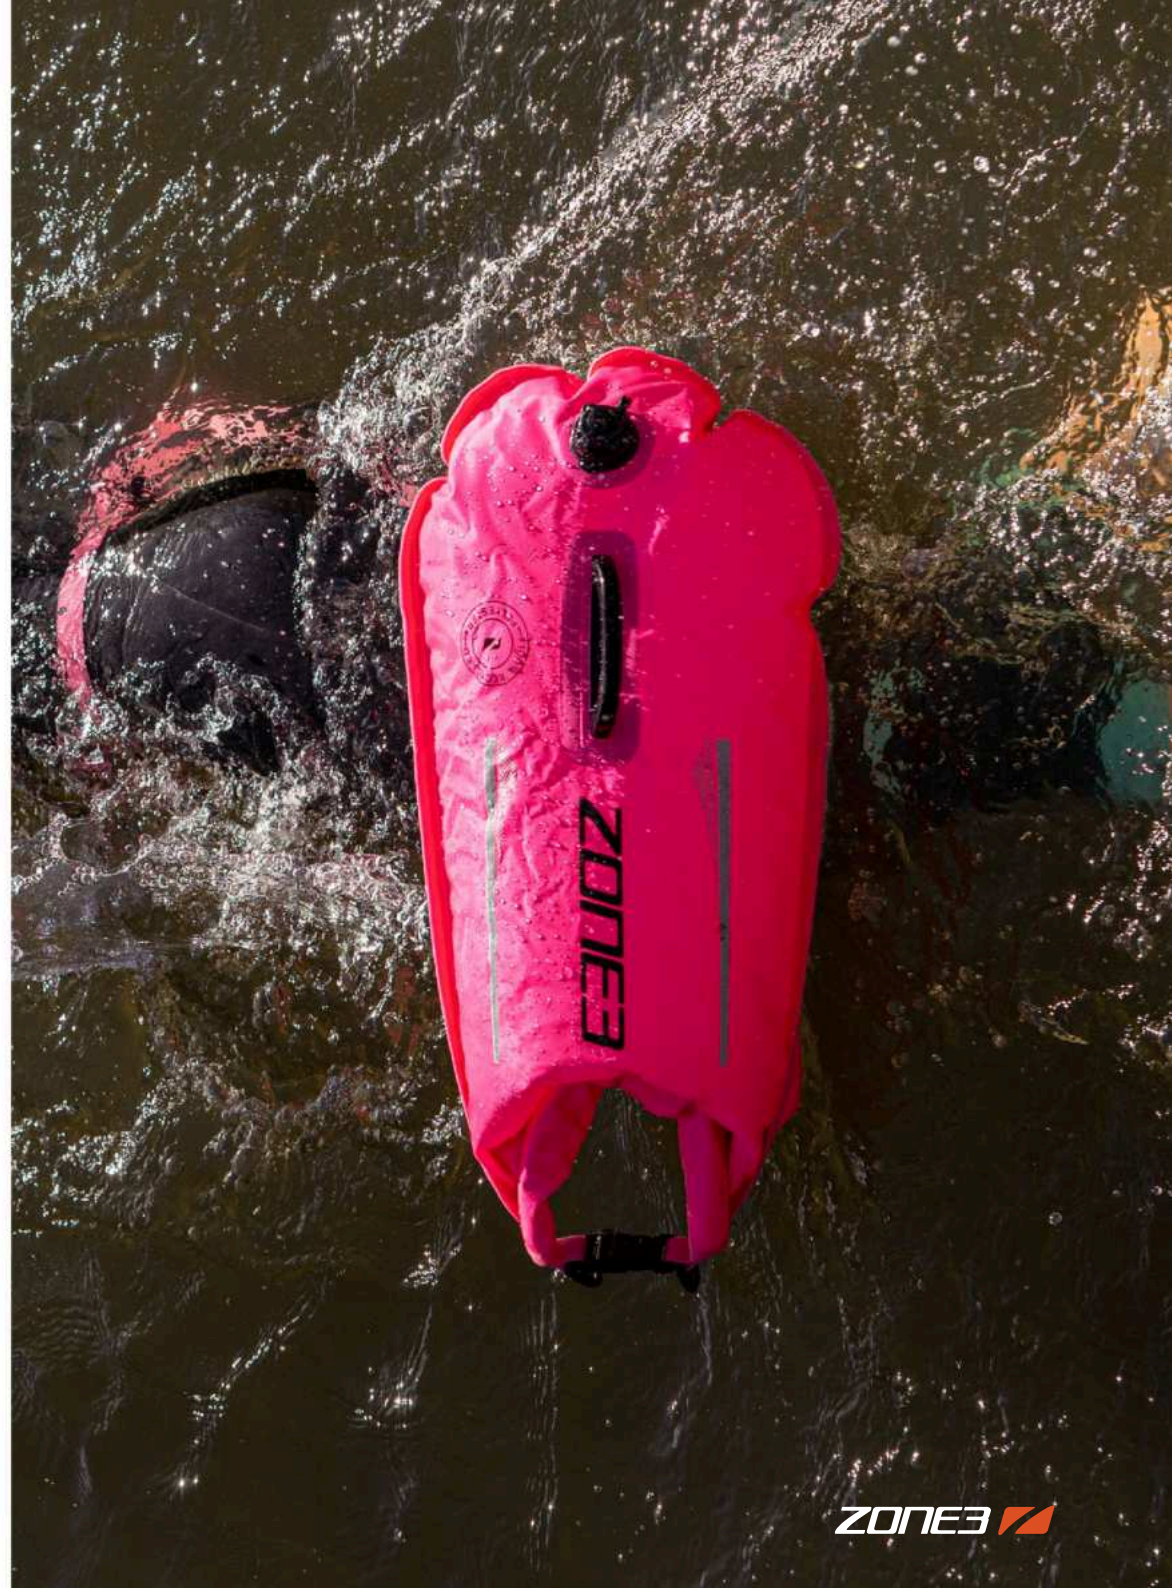

Recycled 28L
Safety Buoy or Dry Bag

SA23RSBDB113

Recycled 28L
Safety Buoy or Dry Bag

SA23RSBDB114

Recycled Swim Safety Buoy or Tow Float

Now using 100% Recycled Polyester (rPET), this tow float design is perfect for new open water swimmers or those who are required to wear them during races or training sessions. The tow float lacks any storage area and is smaller than our bestselling 28L Safety Buoy Dry Bag but still does give great visibility and functionality with a leash strap and carry handle. In addition, the Buoy's now have reflective logos for added visibility.

Recycled Swim Safety Buoy or Tow Float

SA23RSBTF114

Recycled On The Go Swim Buoy

SA24OGSB113

Recycled 2 Led Light 28L Backpack Swim Safety Buoy or Dry Bag 28L

SA23R2LBP113

With straps that allow the drybag to be converted to a backpack, swimmers can carry their kit to swim, hassle-free. The buoy now uses Recycled Polyester (rPET) and offers reflective logos and 2 LED light strips for increased visibility.

Waterproof Phone Pouch

SA21WPP113

An extra layer of protection for your phone or valuables during open water swimming. Simple to use and combine with the Swim Safety Buoy Dry Bag product.

Wetsuit Changing Mat

RA22WSCM101 (Black)

A durable and convenient changing mat that quickly turns into a bag to store wet items. Ideal for open water Swimmers and usable on all surfaces. This product also features a handy shoulder strap.

Goggles

High performance goggles
— for pool and open water
swimming.

It took years of testing to find the perfect goggles to complement the ZONE3 range. They are packed full of great features, including 100% UVA/UVB protection and wide angle anti-fog lenses. We pride ourselves on offering a range of lense types that offer clarity in all types of swimming; There is a style and shape to suit every swimmer.

ULTRA-SOFT GASKET

Ultra-soft silicone gaskets are used on all our goggles; perfect for long distance swims and protecting against wayward limbs. They provide a brilliant seal whilst causing less pressure around the eye.

POLARIZED LIGHT MANAGEMENT SYSTEM

We use premium polarized lenses that reduce the effect of glare from the water and surrounding objects; producing fantastic clarity in all weather.

100% UVA/UVB PROTECTION

All our goggles offer 100% UVA/UVB protection; blocking out the sun's harmful rays.

HORIZON

Our wide angle lenses feature a one-piece curved surface to aid your peripheral vision whilst swimming. This unrestricted view allows you to concentrate on your technique and gives you the full picture of what's around you.

ECLIPSE

Our most advanced technology. Utilising photochromatic technology to automatically adjust to changing light conditions. The weather is an untameable and fickle force that can have a great effect on your performance. By reacting to changes in the brightness levels, our eclipse lenses ensure uninterrupted vision whilst outside.

LUCID

Ultra clear lenses that utilise a combination of the latest polycarbonate materials and high quality finishes to reduce fogging and guarantee crystal clear vision in all conditions. Paired with our Polarized Light Management System, our goggles offer unparalleled clarity of vision.

Venator-X

Goggles from ZONE3 with an exclusive mould design. Combining the best components of the Attack and Vapour goggles, we have been able to make a great fitting, highly comfortable goggle designed for training and racing in open water or for indoor or outdoor pool training.

- + 7 contemporary and stylish colourways available.
- + A variety of lens options depending on the conditions including Polarised Mirror, Photochromatic and Tinted.
- + Super soft silicone gaskets for comfort around the eyes.
- + LUCID lenses with Anti-Fog coating for optimum clarity.
- + HORIZON wide angle, curved lenses for superior vision.
- + Double strap with dimpled grips and easy adjustable sizing.
- + 100% UVA/UVB protection.

Volare

Volare racing goggle is the ultimate hybrid goggle, the low-profile design and performance of a pool racer is perfectly complemented by the comfort afforded by the cushioning of the ultra-soft silicone gaskets usually only featured in open water swimming goggles. This allows the Volare to give outstanding performance in the pool and open water.

- + Interchangeable nose bridge for customised fit.
- + LUCID lenses with anti-fog treatment.
- + HORIZON wide angle lenses.
- + Ultra-soft silicone gaskets for comfort and protection.
- + Polarized Mirror Lens option.
- + 100% UVA/UVB Protection.
- + Twin-adjustable head strap.

Vapour

You won't know how soft and comfortable these goggles are until you try them. Ultra soft silicone combines with a great fit making them the perfect goggle for open water and pool training sessions. The large curved lenses give an excellent field of vision allowing you to carefully navigate your direction and spot any other swimmers. If you are unlucky enough to get hit during a mass participation swim then the ultra-soft silicone gaskets will cushion the blow, whilst also minimising pressure around the eyes keeping you comfortable during those long swims.

- + Ultra-soft silicone gaskets for comfort and protection.
- + Anti-Fog treated lenses and 100% UVA/UVB protection.
- + Large curved lenses for outstanding peripheral vision.
- + Easy adjust strap.
- + Unique & stylish colour options.

Apollo

Goggles

For swimmers who find standard goggles a little too big for them, the Apollo goggles have a smaller frame allowing for a better seal around the eyes on those with a smaller head/ face; ideal for junior swimmers. The ultra-soft silicone seals allow for a comfortable swim over any distance and also minimise the risk of an eye injury from the impact of a flailing limb of another swimmer.

- + Low profile frame.
- + Ultra-soft silicone gaskets for comfort and protection.
- + LUCID lenses with anti-fog treatment.
- + Two different lens options for various light conditions.
- + HORIZON wide angle lenses.
- + 100% UVA/UVB protection.

Vision Max Swim Mask

SA18GOGVI
Lens: Clear

Vision Max Swim Mask

SA25GOGVI
Lens: Rainbow Mirror

For swimmers who are looking for comfort above all else, a mask style swim google is the perfect solution. The ultra-soft silicone seal sits on the forehead and below the eyes taking all pressure off the eyes and delicate eye sockets. The position and size of the seal also takes the impact of any stray limbs of other swimmers allowing the wearer confidence in mass starts and swimming in crowded waters that their mask won't get dislodged.

- + LUCID lenses with tinted finish and anti-fog treatment.
- + Low profile mask style design for minimal drag.
- + HORIZON wide angle lenses (180 ° Panoramic Vision).
- + Scratch resistant lenses.
- + Ultra-soft silicone seal for comfort and protection.
- + Split yoke strap.

Training Kit

Front Facing Snorkel

SA18FFS

A streamline shaped, front facing snorkel to allow you to focus on technique without the need to worry about your breathing.

Ergo Hand Paddles

SA19EPAD113

Ergonomically shaped for optimal catch to develop upper body strength. A great workout with leg bands and buoyancy shorts.

Power Stroke Paddles

SA18CPAD

Designed to develop hand positioning through the water, hi-vis orange on the inside gives a visual aid to the swimmer to help correct swim stroke technique - with thumb & index finger entering the water first.

Protective Swim Goggle Case

SA19GPC

No more hunting around for your goggles at the bottom of your bag and having to replace them every season due to scratched lenses, its time to start taking care of your goggles with a protective case.

Triathlon Apparel

No triathlon is won in the water which is why our tri apparel has been designed to help get you to finish line in the fastest time possible. Performance fabrics and design features ensure maximum comfort and breathability — helping you push harder.

COVERAGE

We carefully select the denier rating and compression of our fabrics so they offer optimum coverage for body confidence.

SILICONE LEG GRIPPERS

Positioned on the leg hem of each suit to prevent any movement of the shorts whilst also helping to prevent irritation. Unique design to offer just the right pressure.

PADS

All suits use Italian designed pads to minimise water absorption and provide protection during the cycling phase, without impeding your swim or run. Fineline stitching is used to ensure maximum comfort and avoid risk of chafing.

CONSTRUCTION

The suits use either an innovative glue-bonded seam structure or flat-lock stitching designed for maximum strength and comfort.

TOTAL ZIP PROTECTION

Each of our suits has had a lot of care and attention put into it, this includes the inner protection system which ensures no rubbing on the sharp edges along the zip.

FABRICS

We utilise the finest fabrics from all over the world to offer the highest performance and comfort during the swim, bike and run. Every product is tied and tested to ensure it meets our high standards. If it's not something our athletes would use, it's not something we'd sell.

POCKETS

Pockets have been carefully positioned onto some suits to store nutritional products or other race accessories whilst not creating excessive drag.

AERODYNAMICS

The suits use either an innovative glue-bonded seam structure or flat-lock stitching designed for maximum strength and comfort. Waterproof coating minimises the suits drag and increases speed through the water.

ELASTIC TECHNOLOGY AND PIPING

Anatomically designed following flatlock or bonded construction for an unrestricted range of movement and reduced chafing. The fabrics are chosen on their performance and elastic properties further enhancing human body movement.

Aeroforce-X II

We have collaborated with **NOPINZ**, specialists in creating aerodynamically optimised cycling speedsuits, to develop the world's fastest tri suit.

European performance fabrics have been put through their paces under numerous conditions, including wind tunnel testing, to ensure each fabric selected utilises all the properties required to improve race times. 3D fabrics disrupt the airflow to cut through the air reducing drag, whilst ultra-lightweight and breathable fabrics, incorporated with ColdBlack technology is used across the body's core which is combined with a water repellent finish to give speed through the water.

These fabrics are also designed to increase the range of motion to reduce fatigue across the shoulders and helps to regulate the body's temperature during the bike and run. Targeted compression on the legs help reduce fatigue and aid recovery time and pads have come from the Italian experts.

Aeroforce-X II Short Sleeve Trisuit

Designed to be the World's Fastest Tri Suit, the new Aeroforce X-II Trisuit has been fully tested in the wind tunnel, velodrome and by elite athletes. Exclusively manufactured in the UK, the suit features an innovative fit and fabric technology, including Speedscalez™, to maximise performance across each discipline. Utilising the facilities at the Boardman performance centre and Aerocoach (our aerodynamic partner) we have performed extensive fabric, pattern layout and competitor testing to help us produce the fastest possible bike time, without sacrificing swim and run comfort.

ZONE3

Lava

Designed and developed for long distance triathlons using the finest quality European fabrics with targeted ColdBlack technology to regulate temperatures with maximum breathability and freedom of movement. Our pads come from the Italian experts, Elastic Interface. These low profile pads, coupled with targeted foam structurer, ensure comfort on the bike while draining quickly after the swim and being unnoticeable on the run. Integrated grippers that are woven into the fabric keep everything in place while being unnoticeable and restricting than standard sewn in grippers.

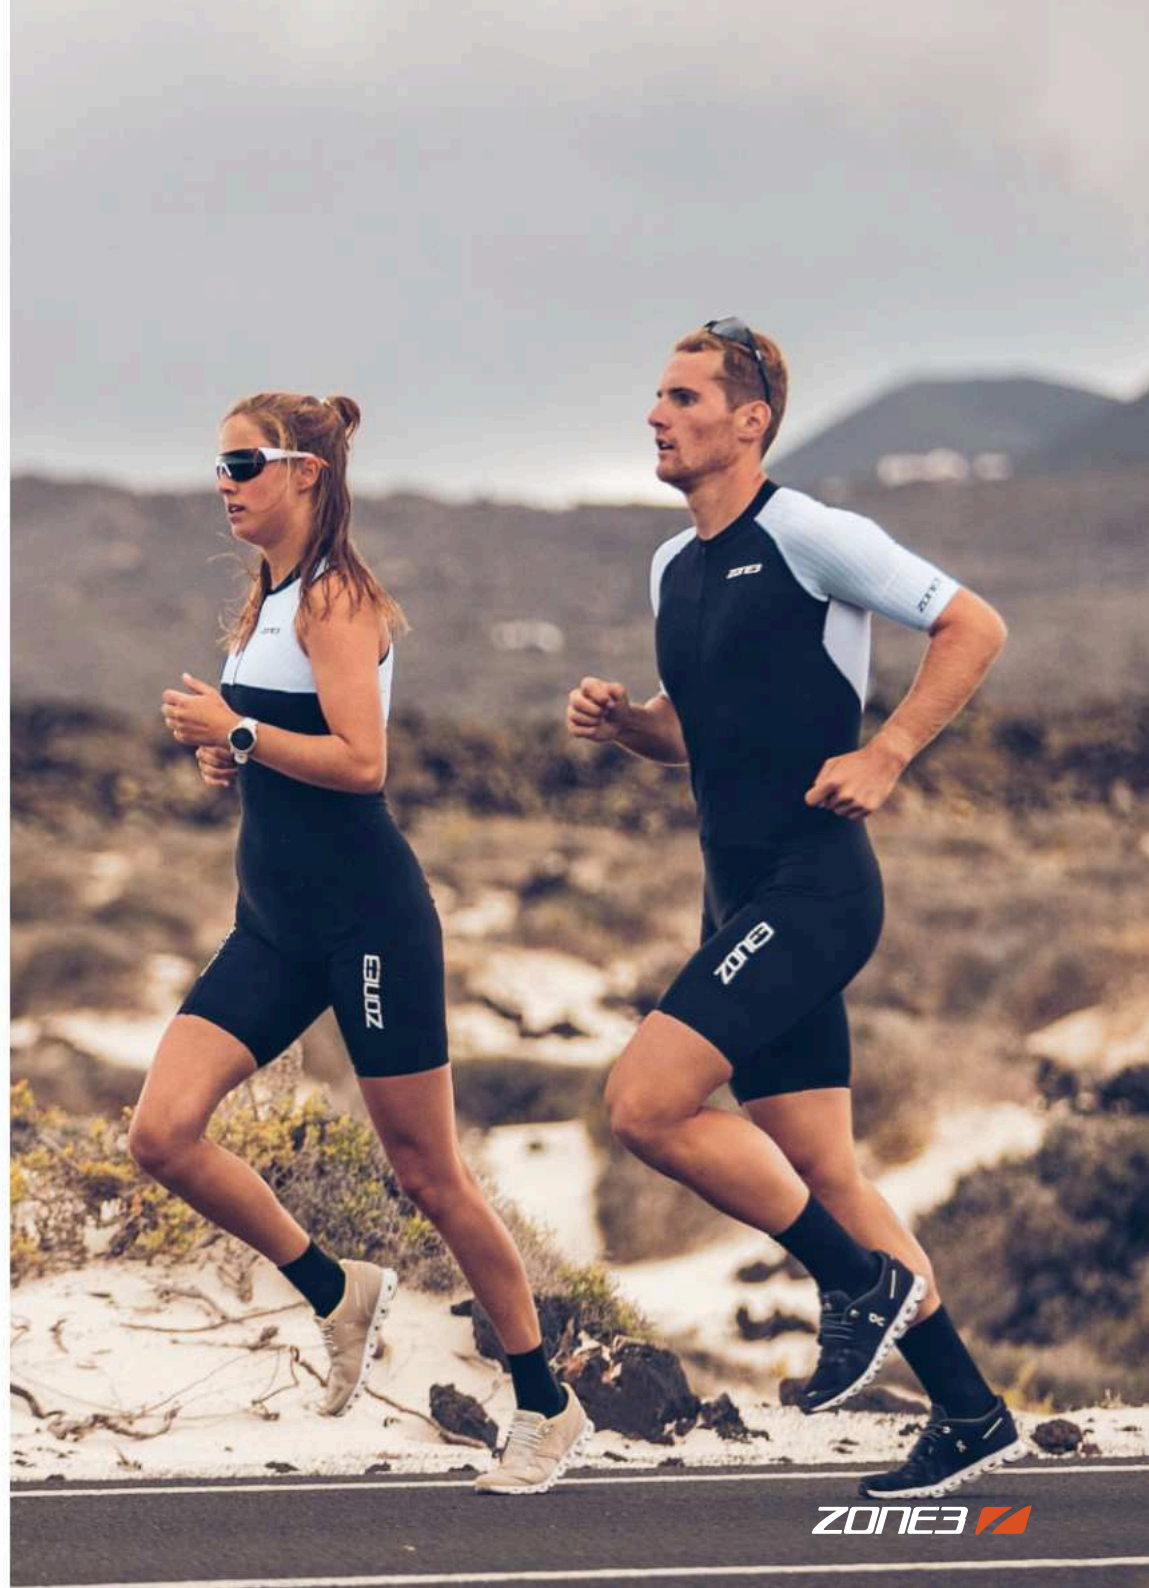

Men's Lava Trisuit

Men's Lava Long
Distance Full Zip Short
Sleeve Aero Trisuit

TS20MLAS101

The Lava suits boast an Impressive selection of features including new sleek styling and ultra lightweight, breathable fabrics with ColdBlack technology. Aerodynamic fabrics on the sleeve and upper back disrupt airflow, helping to cut through the air quicker. The water repellent coating will help to move through the water faster, and the graduated compression assists in getting the most out of each race.

Activate+

the activate plus collection is an evolution of our hugely popular activate range. It maintains value as a key feature, but introduces additional features and a touch of colour with stylish sublimation prints.

The key highlight in SS25 is a move to recycled materials, aligning with our broader goals to introduce sustainable materials into our product development wherever possible.

Activate+ Trisuit

Key Features:

Stylish sublimation printed side panels.
Lightweight and high stretch mesh back panels.
Short Sleeves for added coverage and aerodynamics.
Combines great value with high performance, quality and style.

Key Benefits:

Highly breathable fabrics for sweat management.
Full coverage and shape retention, no more see through moments.
Increased saddle comfort from variable-thickness pad.

Short Sleeve Swimskins

The ZONE3 Swimskin has been designed to be the world's fastest because it's used by the world's fastest. By working with our partners at Yamamoto, we set out to find ways to make our Swimskin even faster by integrating a revolutionary SCS swim fabric which is extremely fast through the water.

The key features of this material include:

- + High-density knitted structure with 100% water repellent SCS coating.
- + SCS technology allows only the surface of suit to have hydrophilic property therefore meeting FINA approval.
- + Normally, swimskin surface frictional resistance is 1.8cdf whereas this innovative new SCS material has a surface frictional resistance of only 0.025cdf making it the world's fastest through the water.

Whilst this material is featured on the chest panel, the rest of the suit continues to offer extra core support and reduced drag. The remaining panels are made up from a selection of our X2R fabrics, a premium revolutionary woven fabric which is one of the lightest and most compressive fabrics available. It is extremely hydrophobic with only a 5% water absorption rate. To minimise drag, seams have been kept to a minimum and are fully seal bonded. The unique short sleeve panel design allows for maximum freedom of movement whilst providing full tri-suit coverage whatever you race in.

Streamline Swimskins

Increased buoyancy, reduced drag and most important of all, more speed! The Zone3 Streamline Sleeveless Swimskin is the result of requests from athletes looking for extra core support and reduced drag during non-wetsuit swims. Uses hydrophobic fabric for maximum compression & minimum water absorption.

Swimwear

Made up of five exciting categories; with Kona Speed, Pacific Koa, OWS Renew, OWS Ti+, and an all-out Race Range, there is something for all tastes and abilities this year as we further expand into the swimwear market. Working with experts within swimwear design, the range not only looks the part but performs to the highest level.

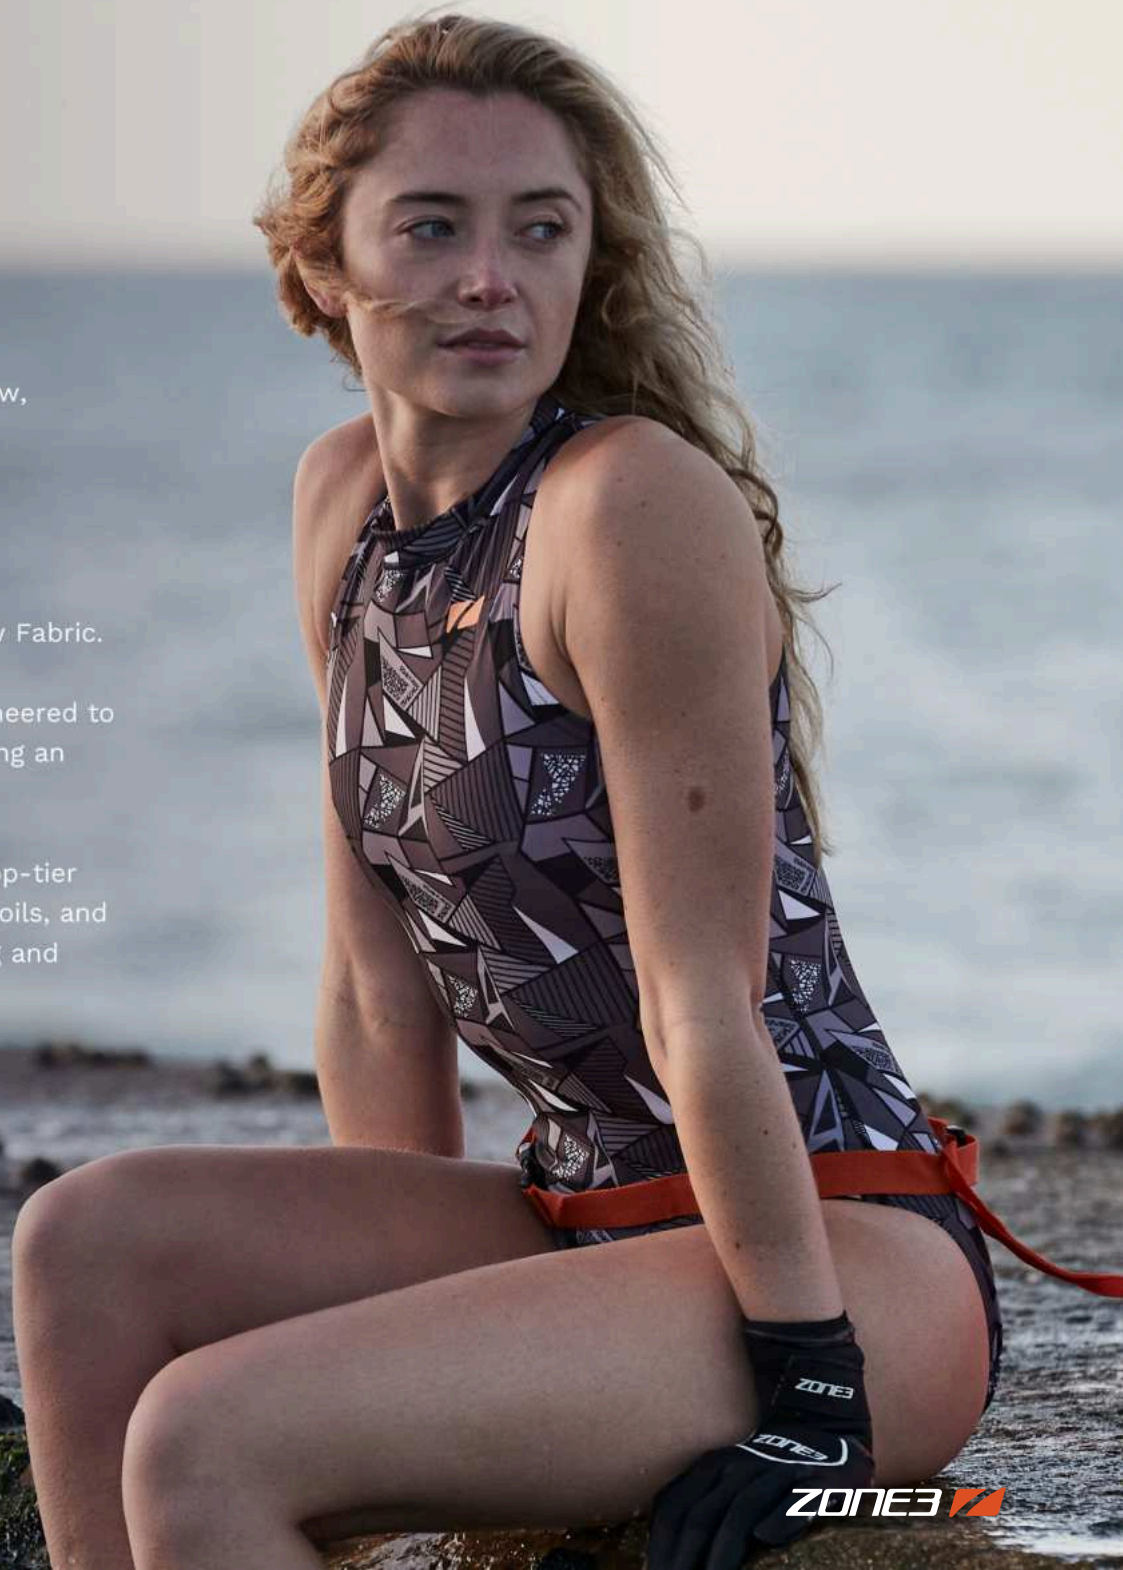

The ZONE3 Swimwear* collection is crafted sustainably using XFINITY Renew Fabric.

This cutting-edge fabric offers superior performance and is specifically engineered to produce swimwear that is both breathable and non-see-through, guaranteeing an impeccable fit and unparalleled freedom of movement.

XFINITY Renew Fabric encompasses all the essential qualities required for top-tier competition swimwear. It exhibits remarkable resistance against sunscreen, oils, and is chlorine proof; ensuring its longevity. Additionally, this fabric is fast-drying and provides UV protection of UPF50+.

*Excluding the FINA approved range and the Ti+ Range.

The Open water swimming range, which is designed for more leisurely swimming, now has an increased size range, and offers a more generous fit, so that everyone can experience the benefits of high quality swimwear.

OWS Ti+ Swimwear

The Women's OWS Ti+ Thermal high neck costumes boast a Titanium lining in body which offers improved thermal efficiency. The costumes are 100% no neoprene but still offer the same warmth benefits. The centre rear zip fastening provides easy access. A high neck design increases warmth and coverage, while an inner bra shelf provides added support. The seams are concealed to provide maximum comfort against the body and supreme hydrodynamics.

The outer material is an extraordinarily glossy surface, which guarantees a perfect fit over time.

OWS Ti+ Range

- + Titanium lining in body for increased warmth.
- + Centre back zip fastening for ease of fastening.
- + High neck for increased coverage and warmth.
- + Inner bra shelf for added support.
- + Concealed seams for comfortable fit against body.
- + Front and back Titanium lining.

- + Reinforced base for structure when in use

Race Accessories

Elastic shoe laces for fast transitions

RA18ELLC101 (Black) | RA18ELLC113 (Neon Orange)
RA18ELLC108 (Red) | RA18ELLC114 (Neon Pink)

Top of the range heavy-duty elastic cord laces perfect for speedy transitions! You simply replace your laces with these elastic cords, use the toggle to adjust the tension, and tie off the ends in a knot so they don't accidentally slip through the cord stopper.

Aero Bento Box V2

RA24BENB101

A new and improved product for this year, this frame mounted storage box allows you to keep nutrition and valuables in an easy to access area whilst keeping in line with your bikes aerodynamic profile.

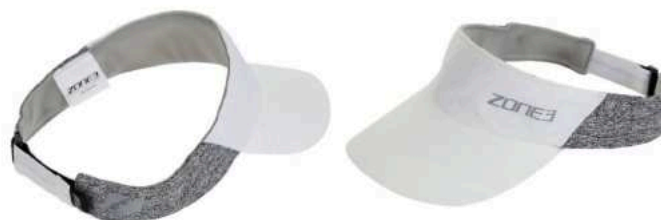

Headwear

A sports specific training cap or visor is probably one of the most overlooked items of clothing. Whether you are in the sun, rain or wanting to keep the sweat out of your eyes they will make even the most arduous runs more enjoyable.

Race Belts

A must for any triathlete, our race belts are made from high quality elastic with sturdy plastic buckle and clips to secure your number, and loops to accommodate energy gels.

Racebelt - Lycra Pouch

RA18RBLP101

21x3.5cm expanding pouch with middle zipper, 2x energy gel loops, reflective patches and elastic clips to secure your race number.

Racebelt - Neoprene Pouch

RA18RBNP101

15.5x 7cm pouch with waterproof zipper, 2x energy gel loops, reflective patches and elastic clips to secure your race number.

Racebelt With Gel Loops V2

RA24RBGL101

The original belt with 3x energy gel storage loops and 3x race number clips.

L	175-188	5'9"-6'2"	78-86	172-189	102-112	40-44
XL	178-196	5'10"-6'5"	85-95	187-209	112-122	44-48
XXL	178-196	5'10"-6'5"	90-105	198-231	117-127	46-50

WOMEN'S TRIWEAR SIZE CHART

SIZE	HEIGHT		WEIGHT		CHEST	
	CM	FT	KG	LBS	CM	IN
XS	152-163	5'0"-5'4"	45-55	88-121	71-81	28-32
S	157-168	5'2"-5'6"	110-132	110-132	76-86	30-34
M	163-175	5'4"-5'9"	132-154	132-154	86-97	34-38
L	168-183	5'6"-6'0"	143-165	143-165	91-102	36-40
XL	168-183	5'6"-6'0"	154-176	154-176	91-107	36-42

FIT TIPS:

- + Triwear should be tight fitting in order to fit under wetsuits and be streamlined throughout a race.
- + Some suits are made of water repellant fabrics which has a little less stretch so if between sizes better to go one up.
- + The suit should feel tight, but if it constricts your breathing then you need to size up.

MEN'S COMPRESSION SIZE CHART

SIZE	HEIGHT		WEIGHT		WAIST	
	CM	FT	KG	LBS	CM	IN
XXS	152-165	5'0-5'7	50-57	110-126	60-71	24-28
XS	157-170	5'2-5'7	54-60	119-132	66-76	26-30
S	167-178	5'6-5'10	62-72	137-159	71-79	28-31
ST	173-185	5'8-6'1	62-75	137-165	71-79	28-31
M	170-185	5'7-6'1	72-80	159-176	79-84	31-33
MT	175-190	5'9-6'3	69-80	152-176	79-84	31-33
L	175-188	5'9-6'2	78-88	172-194	86-96	34-38
XL	178-196	5'10-6'5	85-95	187-209	91-102	36-40
XXL	178-196	5'10-6'5	90-105	198-231	91-107	36-42

WOMEN'S COMPRESSION SIZE CHART

SIZE	HEIGHT		WEIGHT		WAIST	
	CM	FT	KG	LBS	CM	IN
XS	152-162	5'0-5'4	45-55	99-121	61-66	24-26
S	157-167	5'2-5'6	50-60	110-132	66-74	26-29
ST	167-180	5'6-5'11	50-63	110-139	66-74	26-29
M	162-178	5'4-5'10	60-70	132-154	76-81	30-32
L	167-183	5'6-6'0	65-75	143-165	81-91	32-36
XL	170+	5'7+	72+	159+	86+	34+

FIT TIPS:

- + Our compression garments follow a similar sizing strategy to our wetsuits. This is so we can offer the best possible fit for every body type.
- + Remember that to get the full effect of the medical grade fabric you need a good tight fit without being uncomfortable.
- + Working across the size chart should lead to your size.

MEN'S SWIMSKIN SIZE CHART

SIZE	HEIGHT		WEIGHT		CHEST	
	CM	FT	KG	LBS	CM	IN
XS	157-170	5'2"-7'7"	54-60	119-132	81-86	32-34
S	163-178	5'4"-5'10"	62-72	136-158	86-97	34-38
M	170-185	5'7"-6'1"	68-78	150-172	91-102	36-40
L	175-188	5'9"-6'2"	78-86	172-189	102-112	40-44
XL	178-196	5'10"-6'5"	85-95	187-209	112-122	44-48
XXL	178-196	5'10"-6'5"	90-105	198-231	117-127	46-50

FIT TIPS:

- + Swimskins are designed to be worn over your race kit so remember to leave a little room for that.
- + Swimskins are made of water repellant fabrics which has a little less stretch so if between sizes better to go one up.
- + The suit should feel tight, but if it constricts your breathing then you need to size up.
